

4th of July!

Independence Day! It seems as if celebrating this day is a miracle considering it has been 244 years since we as a group of states dared to break with England to be a free people. During this time our country has had one conflict after another. We have fought four wars, (two on our own soil). We have lost fathers, mothers, brothers, sisters and friends to secure these freedoms. They have paid the ultimate price and we must never forget. Let us remember this cost as we continue to deal with the current unrest. There are people both foreign and domestic who are envious of our freedoms and our way of life and plot every day to take them away. Our forefathers were very smart when framing this country on Christian principals. Let us not forget upholding our freedom is the duty of every citizens. Let us not forget, even for a moment; “One Nation Under God”. Through it all, our Country remains strong. God Bless the USA.
